### CSC Offers iPhone Training:

- The first “iPhone for Beginners” group training began earlier this month. The training, funded through the [Senior Independence Fund](#), provided four two-hour group training sessions to eight seniors ranging in ages from 55-82 participated with varying vision diagnoses and degrees of vision loss. [Erin St. Denis](#) and [Randy Knapp](#) were co-trainers with the assistance of CSC Intern [Renee White](#). Participants were trained in basic iPhone landmarks, gestures, settings and how to use Siri. A brief introduction to Voice Over was also provided. After the training, participants who had never used their iPhone before were able to make and answer a phone call and use Siri to check the weather and set an alarm. Participants with better initial skills were able to solidify their basic knowledge, use Siri to open and close apps, read and send e-mails and texts, and use their phones to play music. All participants stated how excited they were to learn how to use their iPhone more efficiently and how much they enjoyed the group setting. The training will conclude with individual time spent with each participant focusing on their own personal needs.

Advanced iPhone training will be offered in the future as well as another introductory course scheduled to begin in October. If you know of anyone 55 and over who may be interested in iPhone classes, please contact [Susie Meles](#) (216-791-8118). Participants must own an iPhone 5 or greater and have their own mobile phone service.

### Where Do the Glasses Go?

- CSC receives donations of eyeglasses throughout the year. Some for several Lions Clubs in the area. Used eyeglasses are then contributed to the Lions Eye Program at St. Vincent Charity Medical Center. An organization called Volunteer Optometric Services to Humanity (VOSH) collects the glasses statewide, cleans them, measures the prescription, labels, then boxes them. Unusable parts of the glasses are recycled. Volunteer groups travel to other countries, often Latin America, where they set up clinics to distribute to people who cannot afford eyecare.
